

## Your question:

With each project that you have done SEO for, please attach with

1. from when to when did you work on the website (approximate is fine)
2. how much time did you spend per month and per week.
3. what strategies did you use specifically
4. how much did the site's organic traffic increase by and when did they start showing up.

## My answer:

I attached my recent successful projects.

As I say about the SEO strategies, there are several things.

As a white hat SEO developer, I used the typical SEO strategies for my former clients such as On-page SEO and off-page.

**-chikoroko.art**(<https://chikoroko.art/>)

1.2022.11-2023.6

2.First 2 months, 40hours per week.

Next 2 months, 10 hours per week.

3.Strategy: On-page SEO, Off-page SEO

4. The result started showing up since 2023. 3.  
Now 40 % increased.

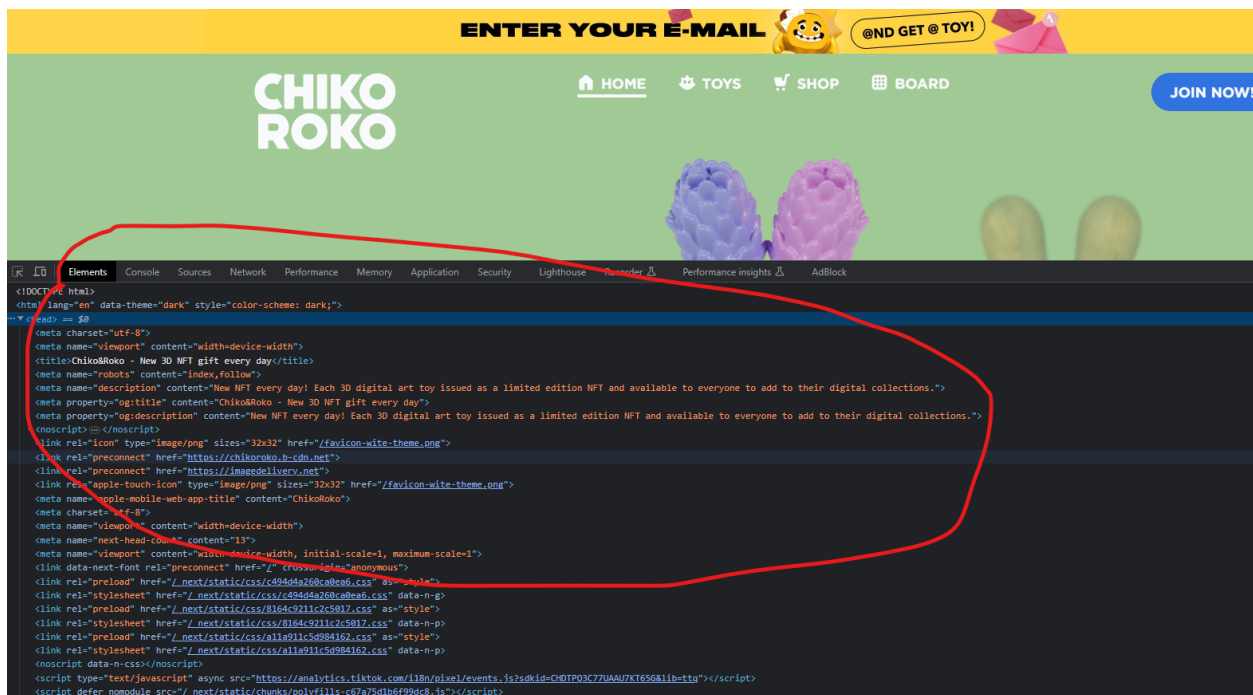

Description:

I have gained practical experience in search engine optimization through the use of Moz Toolkit.

This powerful tool has allowed me to analyze and optimize websites for better visibility and traffic. Its comprehensive features have enabled me to implement effective SEO strategies and improve search engine rankings.

I have utilized Moz's link building tools to enhance this website's search engine optimization.

By leveraging their comprehensive backlink analysis and outreach features, I successfully secured high-quality backlinks from authoritative websites, significantly improving my website's organic rankings. The valuable insights and guidance provided by Moz's platform have greatly contributed to the success of my link building efforts

I also tried to make the clear sitemap and description of whole page for SEO with several kind of tags. Among those, there are several meta tags which have different names: robots, description, og:title, og:description, , title tag and h1 tag etc.

It was great important to make the sitemap and using clearly the title tag, h1 tag and image optimization.

And also, I paid great attention to improve the payload of the website.

As I say about link building,

the successful performance of link building using the Moz toolkit can be attributed to its comprehensive database of high-quality websites, helping to identify valuable link opportunities. The toolkit's sophisticated algorithms and metrics enable accurate analysis of backlink profiles, allowing for strategic decision-making and effective link building campaigns.

Its robust reporting and tracking features further contribute to achieving successful outcomes and improved website rankings.

I implemented the link building with Moz. And then the result caused by it was amazing.

I have utilized Google Analytics to track and analyze website traffic and user behavior for Chikoroko.art. By leveraging this data-driven approach, I successfully identified trends and patterns, allowing me to optimize the website's user experience, increase engagement, and ultimately achieve the project's objectives. Overall, Google Analytics has been instrumental in driving the success of Chikoroko.art.

I have a strong background in website performance analysis, having worked on several projects focusing on improving speed and user experience. Through comprehensive analysis of

website load times code optimization and server response, I was able to identify and resolve performance bottlenecks. As a result, the websites I worked on experienced significant performance improvements, leading to higher user engagement and overall customer satisfaction.

This project is for NFT marketing, too.

So, I think it's the great fit to understand my experience and ability that I can performed your task.

And also I have rich knowledge and experience in code review for SEO, as a Full-Stack developer and **SEO specialist**.

To help you understand my experience and ability, I attached some description about my typical project.

I will attach other projects following your question below.

### -Callerdesk.io( <https://callerdesk.io/>)

1. 2023.1-5
2. At first 2 months: 30 hours per week  
Next 2 months: 15 hours per week
3. Strategy: On-page SEO, link-building
4. since June 2023, now about 50% increased

### -jacklondonsquare.com(<https://jacklondonsquare.com/>)

1. 2023.3-7
2. At first 2 months, 20 hours per week.  
Next 2 months, 5 hours per week.
3. Strategy: On-page SEO
4. since May 2023, the result started showing up.  
Now 48% increased.

I didn't mention about the project I send you yesterday, because you have already checked that. If you want that, I will send the detail about that project.

If you are interested in me, I have some questions.

**First**, Can I see your project?

**Second**, have you implemented SEO in your projects before? If so, what kind of strategy did you use and how about the result?

I have more questions for you, but now I will only ask 2 now.

SEO effectiveness takes a long time.

I look forward to your patience and rich experience in development projects, because the results of my work will appear slowly and continuously.

I am very honored to have a chance the I can work with you.  
Thanks.
